
RISK MANAGEMENT POLICY

1. Objectives

As an oil and gas exploration and production company, Karoon Energy Ltd (Karoon or Company) recognises that effective management of risk is essential to successfully delivering on our ambitions for growth and increased shareholder value.

Karoon is committed to proactively identifying, assessing, mitigating and managing risk throughout the Company.

The objective of Karoon's risk management system is to promote understanding and management of risk in decision making so as to provide greater certainty and confidence in Karoon's performance for our shareholders, employees and the communities in which we operate.

2. Principles

Karoon achieves this objective by:

- Identifying, assessing, monitoring and reporting risks to provide management, the Audit, Risk and Governance Committee, the Sustainability and Operational Risk Committee and the Board with the assurance that all relevant business and operational risks are being identified, managed and appropriately considered in decision making including both transition and physical climate change risks and opportunities and their potential impacts on operations;
- Developing and reviewing a company risk profile for presentation to the Audit, Risk and Governance Committee and the Board for acceptance and periodic review;
- The Audit, Risk and Governance Committee, with reference to the Sustainability and Operational Risk Committee, making recommendations to the Board in respect of Karoon's risk tolerance and particular risks and/or risk management practices;
- Embedding risk management into business activities and processes;
- Understanding, applying and ensuring our tolerance for risk stays current in light of Karoon's exposure to risks across the broad, complex and continually evolving oil and gas environment in which we operate, including in technical areas such as health and safety, operations, production, field development, reservoir performance, and exploration and appraisal, as well as business such as M&A, finance, legal and regulatory compliance, people and culture, environment, social and governance (ESG), reputation and cyber security risks.

3. Application

Management is responsible for implementing this risk management policy throughout Karoon Energy Ltd and its subsidiaries. Senior members of the management team will report to the Audit, Risk and Governance Committee at least annually on the effectiveness of the risk management policy and continue to update the company risk profile through the Risk Tolerance Statement and Corporate and Operational Risk Registers to reflect the activities of Karoon and its commitment to effective risk management.

The Sustainability and Operational Risk Committee will oversee operational risk management for the Company. An Operational Risk Register will be maintained by senior management and reviewed by the Sustainability and Operational Risk Committee to ensure Karoon upholds a low risk tolerance with regard to safety in all its operations and is monitoring and minimising as far as possible material exposure to environmental and social risks.

4. Policy review

A copy of this policy is available on Karoon's website. To ensure that it is operating effectively, the Audit, Risk and Governance Committee will review and if necessary, update this policy at least every 2 years.
